### **DETAILED ACTION**

This Restriction is in response to After-Final Amendment filed August 17, 2006. The finality of claims 1-13, 17-19, 26-34, 42-52 has been withdrawn. The Examiner takes this opportunity to raise the issue of restriction.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 1-13, 30-34, drawn to a computer architecture for tracking objects having an event table for storing event information, rule execution that processes event information according to rules, classified in class 709, subclasses 206.

II. Claims 17-19, 26-29, 42-52, drawn to a system for tracking events having an alert table and alert controller for requesting alert information based on polling intervals, classified in class 709, subclasses 223.

1. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and I have separate utilities such as executing alerts and storing the alerts in alert tables, requesting information about portions of the alerts based on polling intervals. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
